

Corinne's Chinese New Year Fan Craft

What will I need?

Pen

Scissors

Rule

Glue stick

Hold punch

Wool

2 different types of paper

Instructions

1. Cut your 'base paper' into a long strip. Then cut and stick your decorative strip onto the top, just less than half way across.

2. Fold the paper back and forth into a zig zag shape, as above along the shortest edge. Do this until you reach the other side.

3. Squeeze together and punch a hole through the plain end of your fan.

4. Create a simple tassel out of wool by folding 15cm pieces of wool on top of each other and then tie in the middle. Fold one side down onto the other so all loops are in the same place and the knot is at the top. Cut the ends of all the loops and wrap the wool around the top until it looks like the photo above.

5. Thread a piece of wool through the middle of the top loop. Then thread this through the hole in your fan to keep it secure.
